## ROI, time saving, optimizing, for: Project management

Save time	Save money	Save effort	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Easily accessible planning tool – “when can we get together and where?”
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Information distribution: each member of the project team is aware of other team members whereabouts and activity.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Effective meeting booking saves time and effort via the excellent overview
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Structure you own work day in relation to colleagues work plans
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Optimize work procedures. No wasted time on localization when coordinating meetings and informal talks
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Time management and measurement, time statistics relating to actual appointment time used
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Coordination of project team members to ensure compliancy with overall time deadlines and budget limits

### Project management case:

Scenario: As project manager, it is important to effectively distribute information, arrange meetings and control activities throughout an organization. The importance of optimizing the project group is crucial if the deadlines for time and budgets should be kept and the best result achieved. Can project group management and coordination be improved?

Exchange Central is used to set up a project team calendar available to the whole team. Work routines are categorized to enable statistical analysis.

The project manager or team members can arrange meetings that don't conflict with other activities and meetings, thus ensuring that everyone can participate in the meeting. In addition, the manager can monitor time usage for the individual team members and projects, improving the chances of a successful result.

### ROI Calculation:

(Estimated daily time saving for the Project Manager will be at least 30 minutes per day when coordinating the project team with Exchange Central)

- Time saving per week ½ hour per day at €45/hour	\$ 112
- Investment in Exchange Central 25 client version:	\$ 1,225

## Full ROI in less than 11 weeks

Exchange Central from Add-On Products is a crucial tool that increases Return on Investment (ROI) in organizations that use Microsoft's Exchange Server and Outlook. Exchange Centrals functions are seen as “need to have” from the board down to shop floor level of a company. Easily configured to individual needs, Exchange Central increases the flow of information in organizations.
