## Manage Exchange with a Quick Glance at a Single Screen

---

Mailscape is a unique and innovative systems management tool that combines all the key elements for Exchange monitoring, administration, and reporting in a single solution.

Mailscape's sleek dashboard provides you with vital information about each server's current state and growth rate to facilitate proactive Exchange management.

In the words of one Exchange MVP, "Mailscape is a product every Exchange admin on the planet will want to have." Here is why:

- ENow is first and foremost a messaging company. We understand Exchange at its deepest levels, and we've built over a decade of Exchange experience into Mailscape.
- Mailscape combines all the critical elements necessary to keep Exchange happy and healthy into a single, unique solution—you do not need to cobble together a bundle of point products from multiple vendors.
- Mailscape is easy to deploy and intuitive to use. You will be up and running in minutes rather than days. And with Mailscape's elegant interface, you may never need to open the user manual.

Mailscape will make you more efficient; it will enable you to manage Exchange proactively to optimize system performance and minimize downtime; and it will enable your helpdesk to improve the level of service you provide to your end users.

Mailscape is comprised of two integrated, complementary modules that combine to automate and simplify the repetitive manual tasks necessary to keep the email flowing:

## I. One Look Dashboard for Exchange Monitoring

Mailscape's One Look Dashboard is an intuitive, visual approach to monitoring Exchange.

The One Look Dashboard graphically presents real-time data on all the vital components that directly impacts Exchange uptime. The beauty of our visual display is that it points you towards a solution even as it alerts you to a problem—it does not leave you adrift to figure out an issue's cause and its solution.

## II. Compass for Exchange Reporting

Mailscape Compass for Reporting gives you a 'bird's eye view' into your entire Exchange environment.

- Proactively advise senior management of future Exchange storage needs.
- Provide help desk staff with the information they need to improve the level of service to your end users—and at the same time cross-train them to one day become Exchange administrators.
- Plan for and prioritize Exchange maintenance tasks.
- Easily distribute mailboxes across your Exchange databases.
- Quickly and easily view vital information about your users and their mailboxes—Who is approaching a warning, prohibit send, or locked out state? Who has the largest mailboxes? How are your mailboxes distributed per OU, per storage group, per database?
- Automatically access advanced reports so you can stay on top of the direction in which your Exchange environment is heading:
  - **Master Quota Report:** Provides organization-wide data on mailbox sizes, quota status, and warning, prohibit send, and locked out limits.
  - **Top 50 Quota Report:** As above, for the top 50 mailboxes in your organization.
  - **Master Mailbox Report:** Provides organization-wide data on mailbox sizes, number of items, and number of deleted items. Also provides historical trending by day/week/month.
  - **Server Message Traffic Report:** Provides server-by-server data on total messages sent and received and average message size. Also provides historical trending by day/week/month.
  - **User Message Traffic Report:** As above, on a per user basis. Also provides historical trending by day/week/month.
  - **Top 50 Internet Message Users:** Lists the top 50 users sending external email to the Internet so you can track to which domains your users are sending messages.
