Discovery Attender

Electronic Search and Discovery

Discovery Attender for Exchange is a software tool designed to automate the search and collection of electronically stored information (ESI). This stand-alone application helps you find data residing in PST files, Exchange mail stores and file servers with a cost-effective, reproducible methodology. Whether you're involved in litigation, compliance, e-discovery, internal audits, or simply need assistance culling mountains of data, Discovery Attender serves as a user-friendly tool that will gather and produce responsive information in a timely, defensible manner.

General Features

- Optional index to further refine result data
- Key properties of message and file results stored locally
- Summary and detailed reports of the result items
- Fully accessible back-end databases for custom reporting
- Portable projects for efficient organization of workload

Data Reporting & Retrieval

- User-friendly interface for management of result items
- Numerous options for exporting items to PST, .MSG and Native Format
- EDRM compliant XML load files
- De-duplication of results based on user-selected criteria, MD5 hashes
- Annotation and labeling of individual result items for ease of review
- Filter results by location, address, file type or user customized fields
- Optional index to further refine result data
- Key properties of message and file results stored locally
- Summary and detailed reports of the result items
- Fully accessible back-end databases for custom reporting
- Portable projects for efficient organization of workload

Architecture

- Non-intrusive, user-friendly installation
- Works with Exchange 5.5, 2000, 2003 and 2007
- Works with ASCII or Unicode PSTs
- Installed on a desktop or server, no further agents or services are needed

System Requirements

- Windows 2000 or higher
- 1 GHz or higher CPU
- 1 GB of RAM or higher
- Outlook 98 or higher installed and configured with a profile
- Approximately 50 MB HD for the installation (additional hard drive space will be required as projects, searches and optional indexes are created)
- .Net Framework Version 2.0 (installed, if not present)
- Local administrator rights for the installation
- Permissions to the targeted mail stores and network shares

General Features

- Reduce time and cost associated with e-discovery
- Efficient and defensible process tool to help execute discovery requests
- Comply with the Federal Rules of Civil Procedure
- Secure responsive items from multiple sources

- Robust audit trail and chain of custody reporting
- Simple interface for search monitoring and review
- Delegate searching to Lawyers, Paralegals, HR, etc.
- Non-invasive, small footprint
- Easy to install, easy to use

Search Features

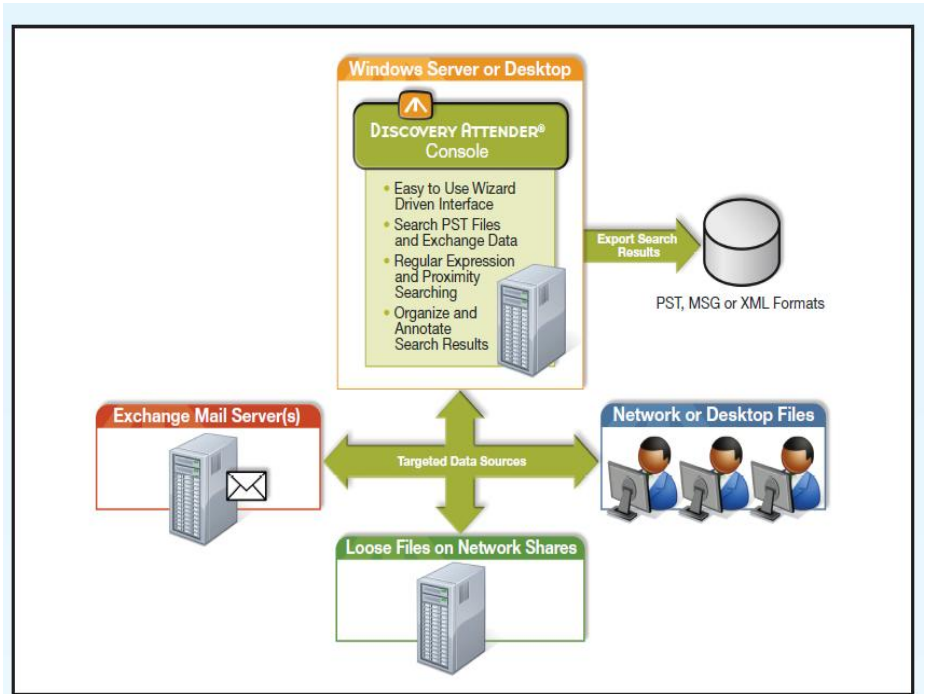

- Wizard interface for intuitive search setup
- Find responsive messages and attachments in mail stores
- Examine files stored on servers or accessible by Windows shares
- Searches common file formats including .doc, .xls, .pdf, .zip, etc.
- Customizable search criteria includes keywords, dates, addresses, type, name and size
- Keyword options include word lists, phrases, proximity, pattern matching and Boolean logic
- Email conditions support subject, body, addresses, internet headers, dates and attachments
- Auto-label to identify results with secondary criteria
- Organize searches and results into centrally accessible projects
