Instant IMtegrity

IMtegrity offers a proven instant messaging archiving solution to help financial services, government agencies, healthcare and other regulated industries manage their Instant Messaging applications. IMtegrity can help companies conform to the latest regulatory standards such as those laid out by the Securities and Exchange Commission (SEC), the Health Insurance Portability and Accountability Act (HIPAA), the National Association of Securities Dealers (NASD), the Sarbanes-Oxley Act (SOA) or the Graham-Leach-Bliley Act (GLBA)..

Features

- **Auditing and Logging** Audit and log who says what, what was promised and when and for how long people chatted on-line.
- **Authenticate** Identify and authenticate anonymous AOL screen names and match them to real user names from your LDAP directory.
- **Disclaimer Text** Notify AOL chat parties with corporate disclaimer text (inbound and outbound).
- **UNICODE/UTF-8** Log chats for all UNICODE/UTF-8 national languages.
- **Color Coding** Easily recognize who said what through the individual person colors in the chat archive.
- **Highly Scalable** Implemented as a highly-scalable, multithreaded IOCP-based Windows service.
- **Multi Client Access** Chat logs are accessible via web browser and/or Lotus Notes clients.
- **Granular access** Provide access to chat logs based upon permissions
